MEDICAL EARLY INTERVENTION

Providing a Best-in-Class Summary for a Seamless Claim Experience

MEDICAL EARLY INTERVENTION

A Medical Early Intervention is a thorough summary that aids the claims team and attorneys in navigating the complexities of a claim. Our team of professionals assists clients in understanding the claim prior to settlement or requests for additional reports such as an MSA, MCP, or LCP.

The EIR addresses diagnosis codes based on report of injury, denied body parts or conditions, appropriateness of current treatment, and identifies portions of the claim that need to be clarified or addressed by the provider to ensure best settlement outcomes for the injured worker.

Our team is comprised of professionals with years of industry experience and our company values support the utmost integrity in reporting. We help our client navigate the details and complexities of a claim.

UNDERSTANDING CLAIMS

helps navigate
claim complexities

THOROUGH REPORTING

comprehensive analysis
outlines issues in every area
