

LIFE CARE PLANNING

Saving Employers Money & Ensuring the Best Possible Care for Employees

LIFE CARE PLAN REPORTS

Life Care Plan (LCP) Reports provide a detailed assessment of individuals who have sustained a catastrophic injury. Our comprehensive reports establish the current and projected future care needed for the injured worker to achieve a quality existence. It summarizes the medical, psychosocial, educational, vocational, and daily living needs of the injured worker.

The Life Care Plan (LCP) outlines a cost assessment of care and equipment needed for the injured worker over the injured worker's lifetime in an easy-to-read format based on evidence-based standards of care. Our knowledgeable team of professionals are available to defend the LCP if necessary.

WHEN TO CONSIDER AN LCP

Consider an LCP when the worker has a catastrophic injury and the file is in litigation. Catastrophic injuries may include loss of limb, traumatic brain injuries, spinal cord injuries (paraplegic, quadriplegic, or tetraplegic), second- or third-degree burns, or multiple body traumas.

COMPREHENSIVE ASSESSMENTS

ensuring both the company and employee are aware of all anticipated expenses
