

MEDICAL COST PROJECTION

Identification of Potential Issues & Complications Before Becoming Problems

MEDICAL COST PROJECTION

A Medical Cost Projection (MCP) projects future injury related medical costs related to a Workers' Compensation injury for claims that do not meet the CMS criteria for MSA submission. The MCP process includes a review of medical records and claim payout history to estimate future Medicare and non-Medicare covered medical expenses.

Our Medical Cost Projection (MCP) accurately projects future medial exposure and becomes an invaluable tool during mediation and settlement negotiations.

WHEN TO CONSIDER AN MCP

Consider an MCP when...

- » ... the claim involves multiple body parts.
- » ... the claim includes multiple dates of injury.
- » ... the injured worker has upcoming surgeries that need to be priced.
- » ... the file requires updated reserves.
- » ... the file has multiple treating providers.

IMPROVED RESERVE SETTING

comprehensive analysis covers both future and current care

SIMPLIFYING DIFFICULTIES

making our clients' jobs easier

EXPERTISE & INTEGRITY

our experienced team is held to the highest standards of ethics and transparency
