

PHARMACY UTILIZATION REVIEW

Ensuring the Most Ethical, Effective, and Economic Medication Regimes

PHARMACY UTILIZATION REVIEW

A comprehensive Pharmacy Utilization Review (PUR) utilizes medical and pharmacy history to evaluate appropriate future medical needs and costs, based on nationally published and accepted standards of care.

The Pharmacy Utilization Review (PUR) will establish baseline evidence to support changes in future treatment, either to taper existing therapy to reduce the potential for drug over-utilization, or to replace existing therapy with more viable medications that adequately address the needs of the injured worker in the most cost-effective manner possible.

PUR CLASSIFICATIONS

A PUR is classified as one or a combination of the following categories:

- » **Prospective** - evaluation of the patient's drug therapy before medication is dispensed.
- » **Concurrent** - ongoing monitoring of the drug therapy during the treatment period.
- » **Retrospective** - review of drug therapy after the medication has been taken.

THE BEST CARE

ensuring every drug is appropriate for the patient's conditions and needs

THE BEST VALUE

developing economical solutions, including generics

THE BEST TEAM

delivering first-class solutions that are as ethical as they are effective
